

# Completing the Schedule B

Example of calculating mileage for “Preceding Year.”

**2002**

January	February	March	April	May	June	July	August	September	October	November	December
---------	----------	-------	-------	-----	------	------	--------	-----------	---------	----------	----------

**2003**

January	February	March	April	May	June	July	August	September	October	November	December
---------	----------	-------	-------	-----	------	------	--------	-----------	---------	----------	----------

**2004**

January	February	March	April	May	June	July	August	September	October	November	December
---------	----------	-------	-------	-----	------	------	--------	-----------	---------	----------	----------

= Preceding Year

= Registration Year

The graph above depicts a registration year of 2004. The preceding year for 2004 registration is July 1, 2002 to June 29, 2003.

The actual miles to be reported on the Schedule B are the total miles driven by the entire fleet during the preceding year. The preceding year is the 12-month period that ends on June 30th of the year prior to the current calendar year.

Note: The preceding year will be the same regardless of when your registration begins in 2004. In other words, if your registration is anytime within the 2004  year, then you need to use the miles of the months shown in the shaded area .
